Subject: Updated Information for Distance Learning

Good afternoon to all!

Today, all teachers had a virtual meeting with Director Smith regarding GACC distance learning. We were informed of a schedule for the weeks until May 1 (hoping that we are able to return to school!)

Monday: No assignment for students! Teachers will virtually meet with Director Smith

Tuesday, Wednesday, Thursday: Students will be assigned distance learning objectives to complete.

Friday: No specific assignment given, will be used to tie up loose ends and prepare for the following week.

In short, three days of distance learning and assignments. That should be good news for you all!! :)

I sent out the first assignment last night that is due tomorrow night by 11:45pm. I am currently working on Wednesday and Thursday's assignments.

I want to keep these assignments interesting, fun and give you all a look into what goes into becoming a nurse (the school part of it)... it is not all what you see on TV. (I will add other medical careers, too)

I wish we could in the lab doing RCP's and talking face to face, but we will make the best of it!!

Again, if any of you have any questions, school related or not... email/text me!

♥️ Nurse Jen

This is what I am thinking for the schedule

Week of March 30: Theory and Theorists

Week of April 6: Nursing Care Plans

Week of April 13: Evidence Based Practice

Week of April 20: Nursing Education

Week of April 27: Exploring Other Medical Careers
